A modular approach to common challenges

Why iNterface?

iNterface is a **modular, multi-functional operational support tool** which provides an Eco-system that can be applied to several business environments. This suite of software is offered on a **secure Web based** platform, accessible from any internet connected smart device. The platform consists of a number **functionally distinct areas** that can operate independently, however demonstrate increased efficiencies and effectiveness when modules are combined. Although each module has its unique area of functionality, they leverage **common data**. The architecture of iNterface ensures **ease of deployment** in varying environments, with minimal customisation for a chosen application.

"**Digitally centralised – Operationally decentralised**"

Bespoke iNterface (Bi)

Your Company's "way of work" is a strategic imperative which can be diluted when having to conform to processes withing traditional ERP and other enterprise systems.

iNterface, by nature of its size and system design can be integrated into your other legacy systems easing concerns around data duplication and facilitating business process automation.

We work with you in identifying your "uniqueness" and together with our system architect's, target the optimal implementation of iNterface for your business.

Typically, this involves utilising more than one module of iNterface

Dashboards and "push" and 'pull' reports can be tailored to support you and ensure that you derive maximum value from using iNterface as a business support platform.

Bespoke iNterface gives you piece of control over the way your chosen systems interact.

Benefits

- Flexible data fields

- Process optimization

- Bespoke integration to legacy systems (API dependent)

- Bespoke dashboards

- Bespoke reporting

- Business Support Tool

- WEB based, always on, accessible anywhere, anytime

- Unlimited Users
